

What do I do if I smell gas?

Leaking gas can cause an explosion. If you smell gas or suspect a gas leak do the following:

- report it immediately to the National Gas Emergency Service (Freephone 0800 111 999)
- turn off the gas supply at the main gas meter
- open the doors and windows
- do not switch anything electrical on or off, including the lights
- do not smoke, strike matches or light candles.
